How To Order

OmniSite's sales and services are handled on a national basis by our sales representative network. Because of this, we do NOT do direct sales. The purpose of this catalog is to provide an easy and streamlined process for our customers to place orders through their sales representative. If you are a new customer or need contact information for your local sales representative, we can assist you at sales@omnisite.com or you can locate a sales rep at www.omnisite.com/where-to-buy.

TO PLACE AN ORDER:

Customers – Work with your sales rep to select the product(s) you wish to purchase from this catalog. Note the listed part number (located under their respective **Order Information** sections) for reference. Contact your sales representative and provide him/her with this information. Your sales rep will complete your OmniSite order.

EXAMPLE ORDER (Please reference the example below for how to give your sales rep order information for your desired product if it were a Crystal Ball with a 1 year standard cellular service plan):

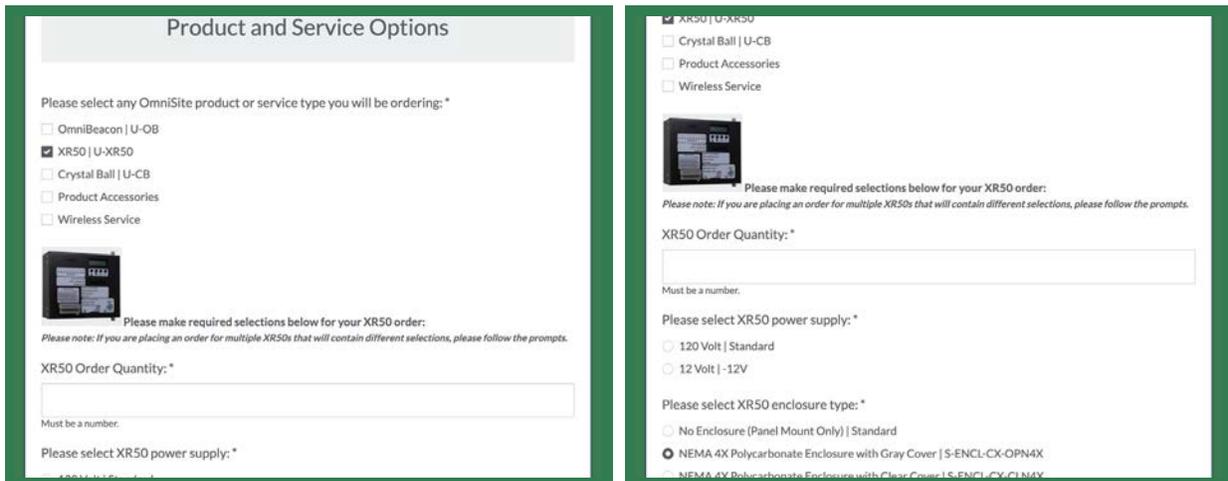

The screenshot shows an email template with the following content:

- To:** [rep-email] Bcc
- Cc:**
- Subject: [Your Company Name] - Purchase Order
- Body: I'd like to purchase a Crystal Ball with a 1 year standard cellular service plan
- Body: Part Numbers: U-CB and S-WS-CX-STD1

Sales Representatives – Obtain order information from your client. Reference that information to fill out our online Product Order Form. This form will provide you with correct part numbers and an estimated quote. When submitted, it goes directly to our sales team.

You can also call in an order to our inside sales team at 317-885-6330 X 4. (We no longer offer an online store. Therefore, methods listed above are the only methods of order placement we support.)

EXAMPLE ORDER (Please reference sample order below for an XR50 with NEMA Enclosure):

The two screenshots show the 'Product and Service Options' form for an XR50. The first screenshot shows the initial selection screen with the following options:

- Please select any OmniSite product or service type you will be ordering: *
- OmniBeacon | U-OB
- XR50 | U-XR50
- Crystal Ball | U-CB
- Product Accessories
- Wireless Service

The second screenshot shows the configuration options for the XR50:

- XR50 | U-XR50
- Crystal Ball | U-CB
- Product Accessories
- Wireless Service

Below these options, there are fields for 'XR50 Order Quantity: *' and 'Please select XR50 power supply: *' with radio button options for '120 Volt | Standard' and '12 Volt | -12V'. At the bottom, there are options for 'Please select XR50 enclosure type: *' with radio button options for 'No Enclosure (Panel Mount Only) | Standard' and 'NEMA 4X Polycarbonate Enclosure with Gray Cover | S-ENCL-CX-OPN4X'.

Some orders may require modifications. Under our new part numbers system, specified modifiers are indicated with a (–).

EXAMPLE ORDER (Please reference sample order below for an XR50 with an AT&T radio modifier and a NEMA Enclosure):

The image displays two side-by-side screenshots of the online Product Order Form for an XR50. The left screenshot, titled 'Product and Service Options', shows a list of product and service type options. The 'XR50 | U-XR50' option is selected with a checked checkbox. Below the list, there is a note: 'Please make required selections below for your XR50 order: Please note: If you are placing an order for multiple XR50s that will contain different selections, please follow the prompts.' The right screenshot shows the 'XR50 Order Quantity' field, which is empty, and the 'XR50 power supply' section with '12 Volt | -12V' selected. Below that, the 'XR50 enclosure type' section has 'NEMA 4X Polycarbonate Enclosure with Gray Cover | S-ENCL-CX-OPN4X' selected. The 'XR50 antenna option' section has 'Internal Antenna Only | Standard' selected. Finally, the 'XR50 cellular radio type' section has 'AT&T | -ATT' selected.

Are you a sales representative that still needs access to the online Product Order Form? Please contact sales@omniste.com.

Please note, all OmniSite products are shipped from our location in Indianapolis, Indiana; shipping and handling will be added to final price.

Warranty

All products come with a one (1) year parts and labor warranty.

To return defective equipment:

Call our support line and receive an RMA number (Returned Material Authorization). We will repair or replace any returned products at our discretion. For more information about our repair policies, please see page 66 of this catalog.

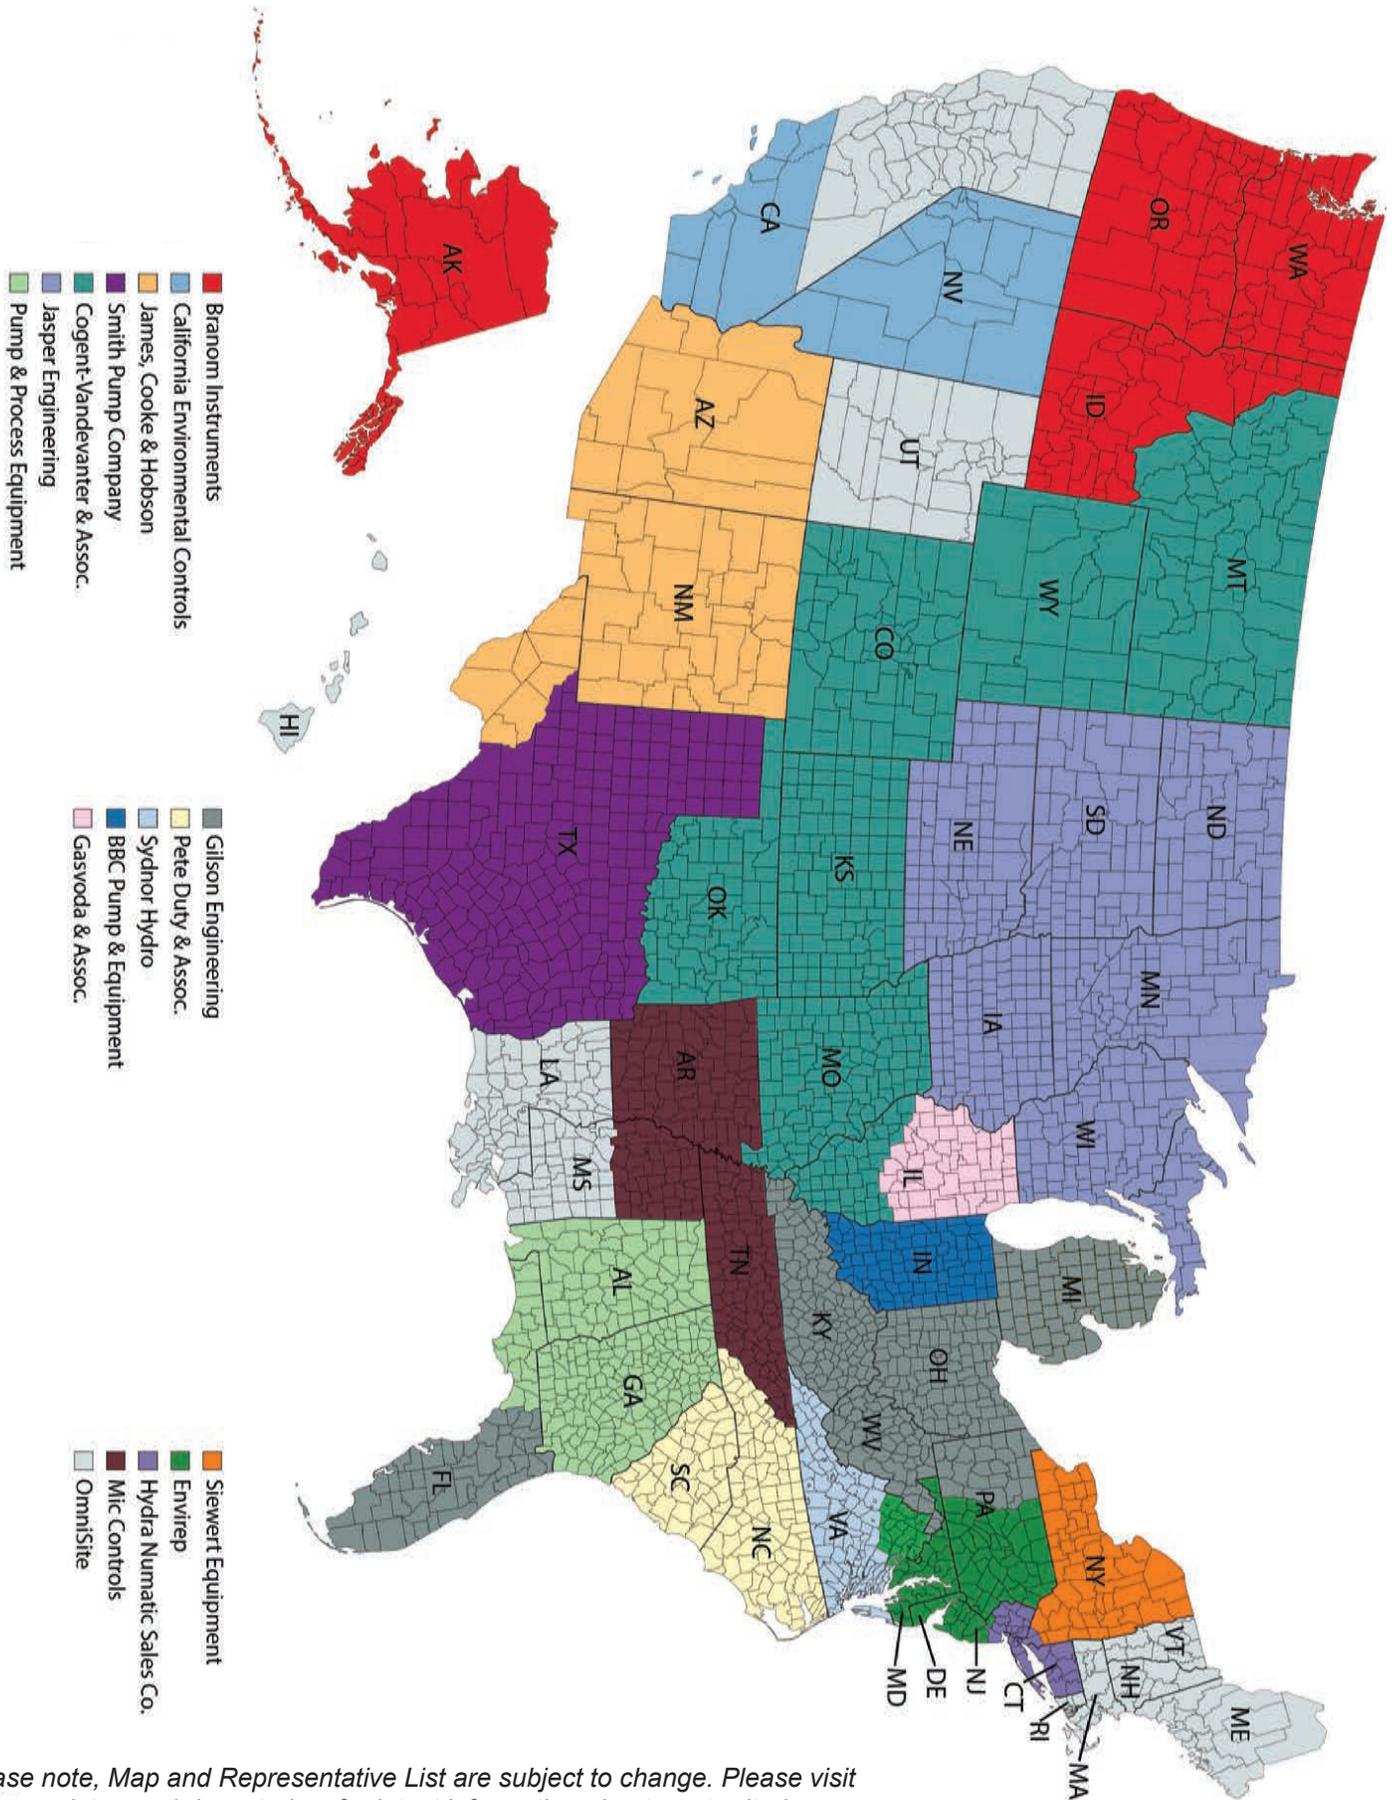

Please note: Defective equipment must be returned to OmniSite by the customer or sales rep at customer or sales representative's expense, unless customer is on the OmniAdvantage Plan. CONTACT SUPPORT: support@omniste.com | 317-885-6330 X 3. For more information about the OmniAdvantage Plan, please see page 67 of this catalog.

Tech Support

Our technical support department is open Mon-Fri, 8AM-5PM EST at 317-885-6330 X 3 or support@omniste.com. If you have an after-hours emergency, call this same number, and follow the phone prompts. (Please note there could be a charge for after-hours support unless you are an OmniAdvantage customer.)

Our technical support team is highly trained, professional, and friendly. Our techs are the same people who do the final test and documentation on all our products that ship out the door. This keeps our techs up-to-date with the latest changes, as well as familiar with all our products.

Master Representative Territory Map

Please note, Map and Representative List are subject to change. Please visit www.omniste.com/where-to-buy for latest information about rep territories.

OmniBeacon Cellular Alarm Light

The OmniSite OmniBeacon is perfect for any application that requires an alarm light. It is an affordable and reliable monitoring solution that includes data logging and web-based access. Unlike traditional alarm lights, the OmniBeacon delivers real-time alert notifications. While created to monitor pump stations, our customers utilize the OmniBeacon's simple and effective design on diverse applications.

Applications

The OmniSite OmniBeacon is applicable to lift stations, pump stations, treatment plants, plus other applications in need of an alarm light. It proves that regulation compliance doesn't have to cost big bucks. This Combination Visual Alarm Beacon and Cellular Transmitter will text, call, or email you if an alarm condition is detected. Plus it can be installed in about an hour or two, requiring only basic wiring knowledge. The OmniBeacon includes OmniSite's "plug and play" GuardDog web interface, which eliminates the need for custom programming.

Features

- Super Bright LEDs and an 85dB annunciator ensure you can see and hear any alarms in addition to receiving voice, text, and email notifications.
- Direct Text messaging backup allows you to still receive alerts if OmniSite's server is unavailable for any reason.
- NEMA 4x equivalent rating for direct mounting indoors or outdoors
- Complete install and setup in about an hour with a 6 ft. field wiring harness for easy electrical connection
- Comes with the OmniSite Modular Radio (OSMR)

Order Information

Part Number: U-OB See page 32 for optional device modifications.

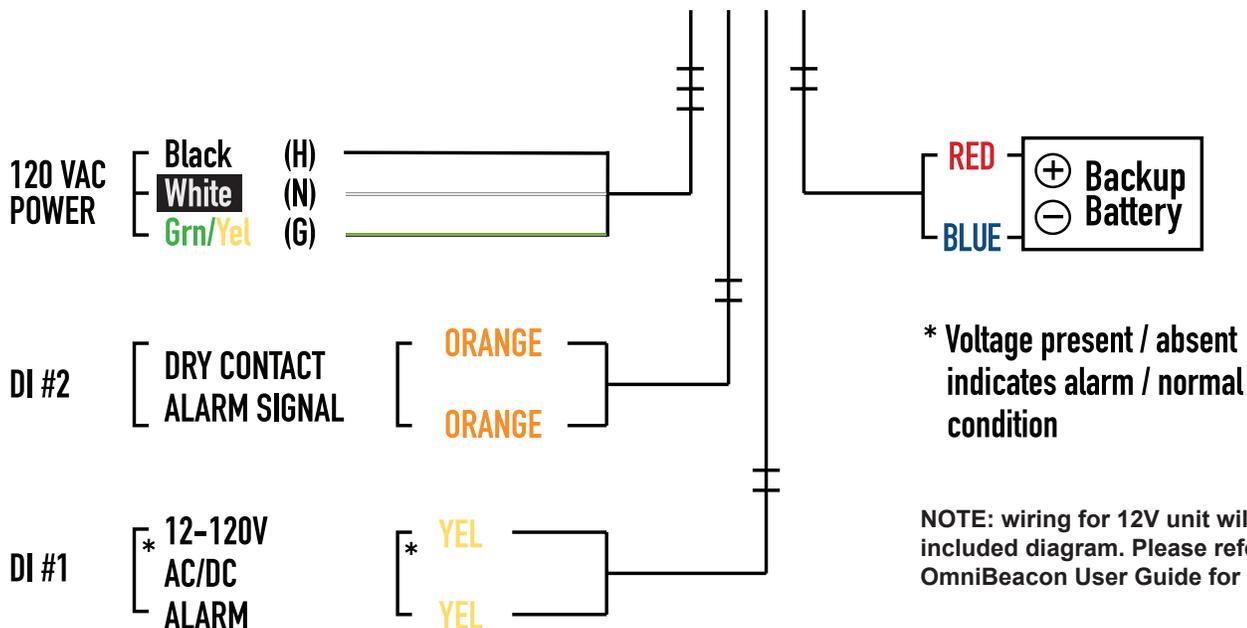

**THIS DEVICE COMES WITH OUR
FREE MONITORING SOFTWARE,
GuardDog**

Specifications

Dual Input Alarm Channels	(1) 12VAC/VDC – 120 VAC/VDC, opto-isolated to 1500VAC input and (1) Dry Contact Input
Alarm Light LED/State	Super bright LEDs, long-life / pulses LEDs at 3Hz, selectable for Inputs #1 and #2
Cellular Radio	4G LTE CAT-1
Certifications	FCC Parts 15, 22, 24; RoHS compliant; IC: RSS-132 & 133
Antenna	Integrated, on board
Input Power	120VAC +/-20% @ 0.5A max; 12VDC Version: 12VDC +/-15% @ 1.5A max
Alarm Light Annunciator	2.8kHz, 85dB, selectable for Inputs #1 and #2, pulses at 3Hz
Backup Battery	External 6VDC Sealed Lead Acid, 1.3AH, Rechargeable, .187" Faston spades
Operating Temp.	-20/150 Deg F
Operating Humidity	0-90% RH, non-condensing
Dimensions	5"W round base x 5"H
Weight	1 lb
Protections	US Patent #7,228,129 and #7,778,633

Wiring

LOOK FOR THIS SYMBOL TO FIND MODIFICATIONS AND ACCESSORIES FOR THE XR50

XR50 Remote Telemetry Unit

The OmniSite XR50 is perfect for monitoring digital alarm inputs and analyzing trends at a lift station. With the ability to record pump runtimes, GPMs, pump cycles, and more, the XR50 is the advanced solution for monitoring both critical and remote applications. Your connected equipment is completely monitored over the Internet, and comes with our FREE GuardDog software. If an abnormal condition occurs, alarms are sent by email, text message, or voice call to any location.

Applications

The OmniSite XR50 is applicable to pump stations, lift stations, plus other applications in need of trend analysis. The XR50 is a flexible, easy to install and configure, powerful equipment alarm monitor. This single integrated device eliminates the need for multiple PLCs, radios, software, computers modems, relays and other accessories. The complete packaged unit can be installed in under four hours, requiring only basic wiring knowledge. The XR50 includes OmniSite's "plug and play" GuardDog web interface which eliminates the need for custom programming.

Features

- Microprocessor based alarm monitor
- Pulse counter totalization feature
- Daily reports of accumulated equipment runtime
- True SCADA replacement at fraction of cost/complexity
- Cellular coverage works where private radio systems cannot reach
- Comes with the OmniSite Modular Radio (OSMR)

Order Information

Part Number: U-XR50 See page 32 for optional device modifications.

Please Note: This device comes standard as a panel mount model. Panel mount models require an external antenna. Please see options below.

High Gain Directional Antenna (page 36) with the correct length of coax cable (page 38).

Phantom Antenna (page 37) with coax cable (page 38).

If you order this device as an enclosure mounted model, it comes standard with an internal antenna. However, the above external antenna options are available as upgrades.

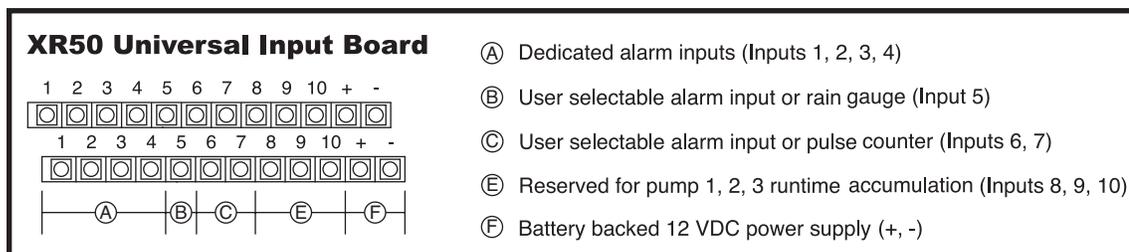

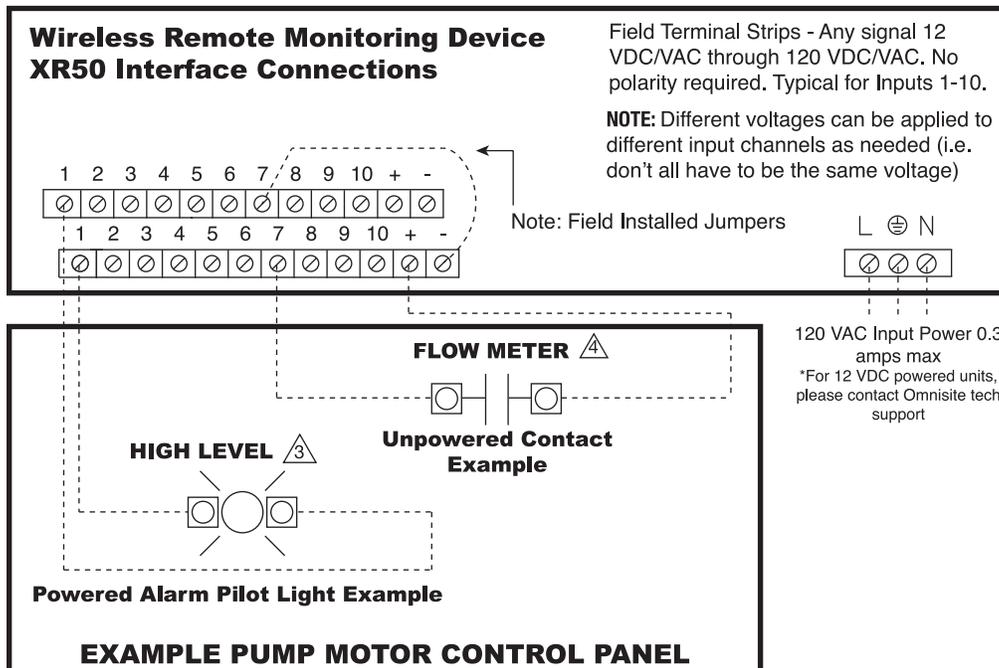

**THIS DEVICE COMES WITH OUR
FREE MONITORING SOFTWARE,
GuardDog**

Specifications

Input Power	120VAC +/-10% @ 0.3A max; 12VDC Version: 12VDC +/-10% @ 2.1A max
Cellular Radio	4G LTE CAT-1/CAT-M1, OSRM
Access Key	Smart security key to identify personnel on site
Terminal Blocks	Removable style accepts #14-18 AWG solid or stranded wire
Operating Temp/ Humidity	-20/150 Deg F / 0-90% RH Non-condensing
Backup Battery	Internal 12VDC Sealed Lead Acid, 800mAH, Rechargeable
Dimensions	9.0"H x 9.5"W x "3.5D (dimensions do not include an antenna attached)
SD Card Format	FAT 16
LCD Display	Backlit 2 x 16 lines
Keypad	(4) navigation buttons
Digital Inputs	(10) Inputs accept 12 VAC/VDC – 120 VAC/VDC
Protections	US Patent #7,228,129 and #7,778,633

LOOK FOR THIS SYMBOL TO FIND MODIFICATIONS AND ACCESSORIES FOR THE CRYSTAL BALL

Crystal Ball Remote Telemetry Unit

The OmniSite Crystal Ball doubles as both a Cellular Pump Station Monitor and a Backup Pump Controller, making it the perfect solution for monitoring critical or remote applications. Your connected equipment and machinery is completely monitored over the Internet, and comes with our FREE GuardDog software. If an abnormal condition occurs, alarms are sent by e-mail, text message, or voice call to any location.

Applications

The OmniSite Crystal Ball is applicable to pump stations, lift stations, plus other applications in need of trend analysis and pump control. The Crystal Ball is a flexible, easy to install and configure, powerful controller/monitor. Its single integrated controller eliminates the need for multiple PLCs, radios, software, computers, modems, relays and other accessories. The complete packaged unit can be installed in under four hours, requiring only basic wiring knowledge.

The Crystal Ball includes OmniSite's "plug and play" GuardDog web interface, which eliminates the need for custom programming.

Features

- Immediate alarm reporting
- Machinery Operational Data reporting - every 15 minutes using the Elite Data package or every 24 hours using Standard Data Package
- True SCADA replacement at a fraction of the cost
- Perfect solution for monitoring critical or remote applications
- Advanced Internet based monitor, analyzer and controller
- Comes with the OmniSite Modular Radio (OSMR)

High Gain Directional Antenna Assembly with Mounting Bracket Kit

The High Gain Directional Antenna offers a simple, cost effective way of improving the cellular reception of your OmniSite Unit. This antenna can be mounted on a wall or mast with both mounting brackets included in the kit. Use this antenna for applications where the signal strength in the area is known to be weak. Mounting and weather proofing kits are included and must be used during installation.

Order Information

Part Number: S-CBL-CX-DIRASM

A coax cable is **NOT** included. Select your desired coax cable length at purchase. See page 38 of this catalog.

Works With:

Applications

Increase cellular reception for your XR50 or Crystal Ball

Kit Includes

- 1 x Directional Antenna
- 1 x Mast Mount U-Bolt
- 1 x Scissor Wall Bracket
- 1x Cord Grip and Weather Proof Tape

Specifications

4G Frequencies:	1900-2170MHz
Typical VSWR:	≤ 2.5:1
Peak Gain:	8 dBi
Max Input Power:	50 W
Pattern:	Directional
Width:	155 mm
Height:	155mm
Operating Temp:	-40 / +80° C
Mounting Type:	Wall Mount; Mast Mount
Mounting Method:	Wall Bracket; Mast Clamp; U Bolt; Screw Mount
Flame Retardancy:	UL94 V0

KEY:

XR50

OmniBeacon

Outdoor Omnidirectional Phantom Antenna with Mounting Bracket Kit

The Outdoor Phantom Antenna Bracket Kit w/ Coax Cable is a great option for improving the cellular reception of your OmniSite unit when a High Gain Directional Antenna may not be required.

This is the antenna you will want to order if you are mounting your XR50 or Crystal Ball inside of a **METAL** pump control panel. If your XR50 or Crystal Ball is mounted in a plastic or fiberglass enclosure, we recommend using our Stubby 4G Antenna (page 39).

Works With:

Order Information

Part Number: S-CBL-CX-ABRK

A coax cable is **NOT** included. Select your desired coax cable length at purchase. See page 38 of this catalog.

Applications

Increase cellular reception for your XR50 or Crystal Ball. Used if your product is mounted underground, in a metal cabinet, or in a low lying area.

Kit Includes

- (1) Phantom Antenna
- (1) Custom Mounting Bracket
- (2) 3" Strip of Weather Sealant & Marking Tape

Specifications

4G	1900-2170MHz
Frequencies:	≤ 2.5:1
Peak Gain:	3 dBi
Max Input Power:	50 W
Pattern:	Omnidirectional
Width:	2 in. round antenna with 6 in. X 8 in plate
Height:	4 in.
Operating Temp:	-40 / +80° C
Mounting Type:	Wall Mount
Mounting Method:	Wall Bracket

GET THE SOLUTION THAT WORKS FOR YOU.

SMA TWS195 Coax Cable (Purchase for High Gain Directional Antenna)

This cable is made of solid polyethylene dielectric and is terminated SMA Male to SMA Male. The cable can **ONLY** be used with the High Gain Directional Antenna to extend the antenna to a location where suitable cellular reception is received in difficult applications.

Order Information

Part Number:

- 06' - S-CBL-CX-S6TWS
- 10' - S-CBL-CX-S10TWS
- 30' - S-CBL-CX-S30TWS
- 50' - S-CBL-CX-S50TWS

Works
With:

You may **ONLY** use this with our Outdoor High Gain Directional Panel Antenna Assembly with Mounting Bracket Kit (page 36).

SMA TWS195 Coax Cable (Purchase for Phantom Antenna)

This coax cable is a solid center ATX195 made of solid polyethylene dielectric terminated N Male to SMA Male. The cable can **ONLY** be used with the Outdoor Phantom Antenna Bracket Kit to extend the antenna to a location where suitable cellular reception is received in difficult applications.

(6' Ideal length for Phantom when panel mounting OmniSite inside existing pump panel.)

Order Information

Part Number:

- 6' - S-CBL-CX-C6TWS
- 10' - S-CBL-CX-C10TWS
- 30' - S-CBL-CX-C30TWS
- 50' - S-CBL-CX-C50TWS

Works
With:

You may **ONLY** use this when purchasing the Outdoor Omnidirectional Phantom Antenna Bracket Kit (page 37).

KEY:

Crystal Ball

XR50

OmniBeacon

Internal Stubby 4G Antenna

This smaller antenna has no coax cable, which will have less RF losses. Enclosures no longer require a hole drilled on top, which can be a point for future water leak. The back panel is cut away from this antenna, to allow reception inside our enclosure (page 33).

Please note: this antenna option is replacing the previous Internal PCB antenna option.

Works
With:

Order Information

Part Number: S-CBL-CX-ANT SMA

The Internal Stubby 4G Antenna is recommended on all XR50 and Crystal Ball units where an enclosure is ordered (page 33.)

GET THE SOLUTION THAT WORKS FOR YOU.

Our accessories are conveniently labeled with the device(s) they work with. Just look for the symbol that matches your device.

Current Switch

This split core current sensing switch monitors motor current (amperage) in the conductor passing through it. The sensor has a fixed trip point at 150 mA AC max (200 mA for 50 Hz).

Eliminates the expertise needed to correctly wire-in to a motor control circuit by merely inserting the probe onto a “hot” leg of the motor and then wiring to any OmniSite XR50 or Crystal Ball input.

This current switch can be used with your OmniSite unit to indicate “positive proof” when a motor is running or stopped.

Works With:

Order Information

Part Number: S-MI-CS200A

Applications

- Monitor Motor Current in Pumps
- Pump Station Monitoring

Features

- Clamp style eliminates need to wire-in, decreases set up time.

Specifications

- **Sensor Power:** Induced from monitored current
- **Insulation Class:** 600VAC RMS (UL), 300VAC RMS (CE)
- **Frequency Range:** 50/60 Hz
- **Temperature Range:** -15° to 40°C (5° to 104°F) (to 200A); -15° to 60°C (5° to 140°F) (to 150A)
- **Humidity Range:** 10-90% RH, non-condensing
- **Terminal Block**
- **Maximum Wire Size:** 14 AWG
- **Terminal Block**
- **Torque (nominal):** 4 in-lbs
- **Agency Approvals:** UL 508 open device listing
CE:EN61010-1:2001-02, CAT III, deg. 2, basic insulation

4-20 mA Amp Probe

The OmniSite Amp Probe will monitor AC motor amperage from 0-50, 0-100, or 0-200 amperes. The sensor outputs a 2-wire, 4-20mA signal. The sensors are a solid-core, where the conductor runs through the sensor. Amp probes are not needed to calculate pump on/off cycles and runtime, but are required to display pump amperage.

Works With:

Order Information

Part Number: S-MI-420MAP

Applications

- Monitor AC Motor Amperage
- Pump Station Monitoring

Features

- Solid core

Specifications

- **Amperage Range:** 0 to 50/100/200 Amps (slide switch selectable)
- **Sensor Power:** 3 0mA (max)@12 to 30 VDC
- **Insulation Class:** 600 VAC RMS (UL), 300 VAC RMS (CE)
- **Frequency:** 50/60Hz
- **Temperature Range:** -15° to 60°C (5° to 140°F)
- **Humidity Range:** 10-90% RH, non-condensing
- **Accuracy:** ±2% FS from 10% to 100% of selected range, but not less than ±0.4 A
- **Response Time:** 2 sec.
- **Terminal Block Maximum Wire Size:** 14 AWG
- **Terminal Block Torque (nominal):** 4 in-lbs (0.45 N-m)
- **Agency Approvals:** UL 508 open device listing
CE: EN61010-1:2001-2, CAT III, Pollution Degree 2, basic insulation

I-Level Submersible Level Probe – Explosion Proof

The I-Level from OmniSite is a next generation level transmitter for measuring water levels in sewage pumping stations, wells, and tanks. It's all stainless-steel design incorporates a highly clog resistant diaphragm protected by heavy-duty stainless steel weight. The explosion proof design is ideal for areas that have the potential for the build-up of explosive gases. The 0-20ft. factory calibrated range of the I-Level is optimized for use with the OmniSite Crystal Ball product in a lift station application, however it can be used in any application that accepts a 4-20mA output signal.

Works
With:

Order Information

Part Number: S-MI-Ilevel

Applications

- Submersible pump lift station level monitoring
- Wet wells
- Process sumps
- Water tanks and reservoirs
- Process sludge (including heavy sludge)
- Water and wastewater level monitoring

Features

- Stainless steel-sensing diaphragm resists clogging
- Protective weight reduces risk of sensor damage
- Submersible to 1,100 feet (335 meters) WC
- Corrosion-resistant, all stainless steel construction
- Surge protection from lightning strikes and voltage spikes
- Extremely rugged housing
- Explosion proof for Class I, Div. I & II
- A range of 4-20 mA = 0-20 ft, H2O
- 50 ft Cable Length

KEY:

Crystal Ball

XR50

OmniBeacon

Specifications

Measurement Range:	0-20 ft.
Accuracy:	0.25% F.S (including linearity, repeatability, and hysteresis)
Long Term Stability:	± 0.2 % F.S. per year
Output Signal:	4mA to 20 mA (two-wire type)
Power Supply:	12 VDC – 24 VDC ± 10%
Response Time:	10ms
Allowed Overpressure:	2.5 times full scale
Compensated Temperature:	from -10°C to +60°C
Load Impedance:	50K Ω min. for < 0.1% FSO attenuation
Input Current:	8mA nominal
Insulation Resistance:	10M Ω @ 50 VDC and +70 degrees F
Connection:	50 ft of 3-conductor #20g Hytrel jacketed Cable with breather tube utilizing Teflon hydrophobic filter
Weight:	5 lbs.
Materials:	All 316 stainless steel exterior body and diaphragm
Operating Temperature:	Temperature: 32 Degrees F – 150 Degrees F
Thermal Drift:	+/- 2.0% FS 50/100 Degrees F

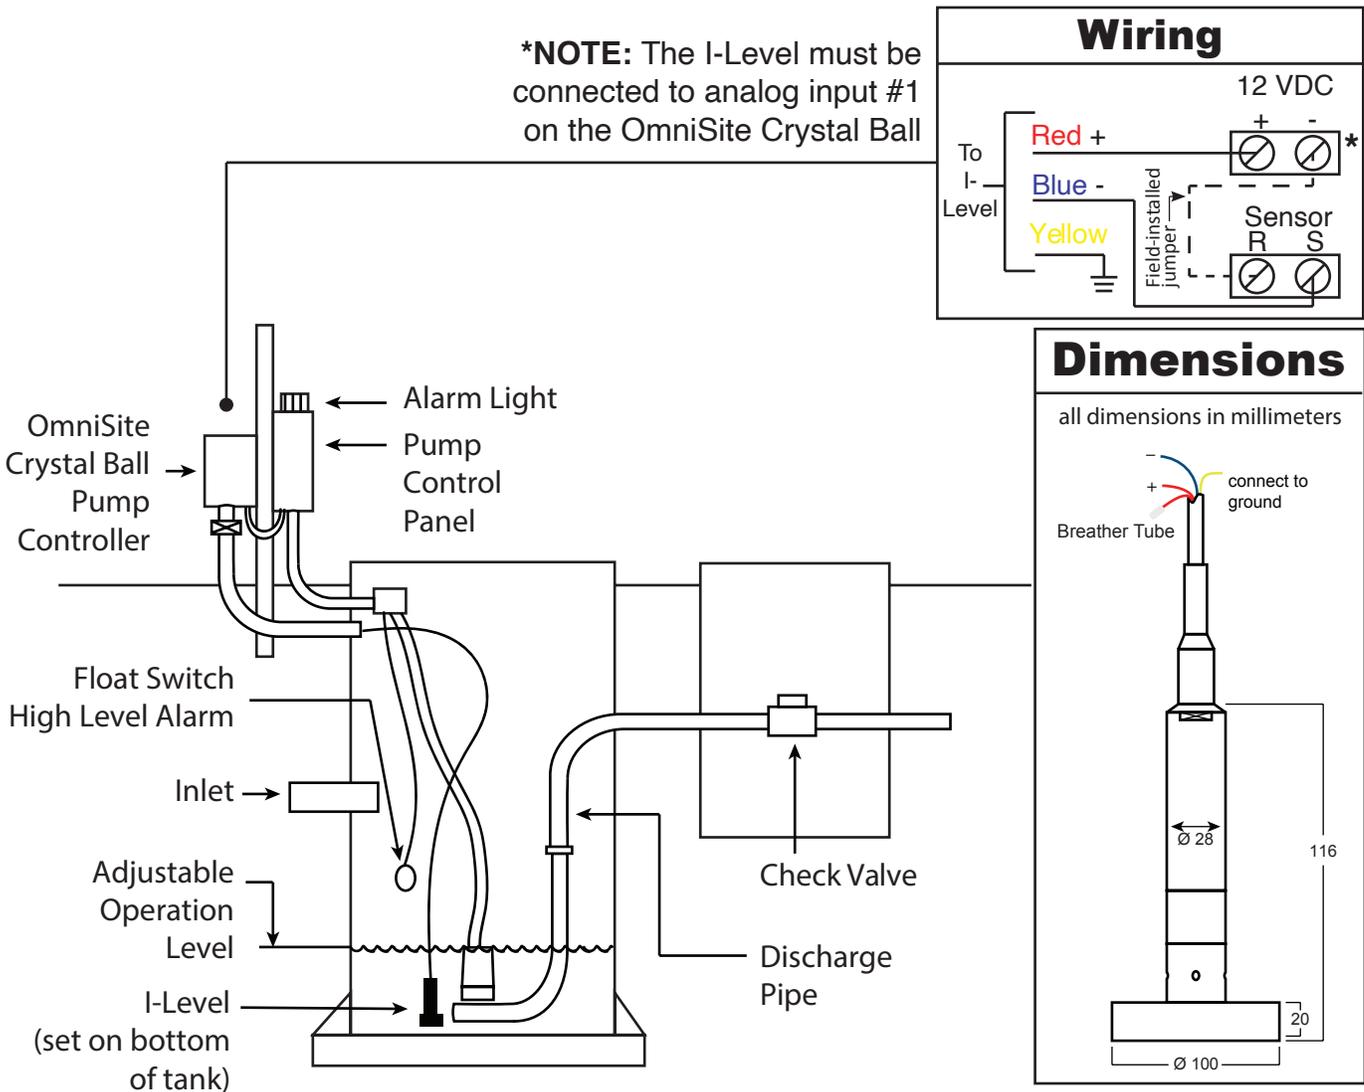

Pump Lift Station Application

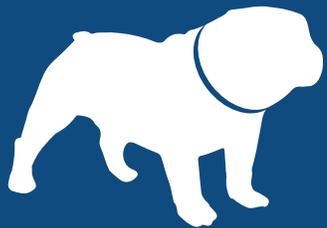

Product Usage: Simply set the weighted I-Level on the bottom of your sewage wet well or tank and connect the wires to the Crystal Ball Pump Controller as shown in the wiring diagram found on the next page. The I-Level will send its 4-20mA signal to the Crystal Ball to indicate well level. If the Crystal Ball is set up for pump control using a level probe or level probe with float backup, the Crystal Ball will then automatically cycle the pump(s) to maintain level set point. All the lift station data is transmitted to the OmniSite GuardDog phone app so you can keep track of well level and pump operation from anywhere, anytime.

Rain Gauge

The Rain Gauge is a tipping bucket style rain collector. Once the rain gauge measures .01” of rain, the gauge will tip and close the contact closure. The enclosure is made of a UV-stabilized ABS plastic. (must be connected to Input #5).

The optional heater allows the rain gauge to operate below freezing temperatures for winter operation.

Order Information

Part Number: S-MI-RGAUGE

Works With:

WITH HEATER

Part Number: S-MI-RAINHA

Applications

- Monitor Rain Amounts at Pump Stations

Features

- Constructed of tough, UV resistant plastic
- Stainless steel adjustment screws allow fine-tuning of the calibration
- Tipping bucket

Specifications

Sensor Type:	Tipping bucket w/magnetic reed switch
Output:	Contact closure
Attached Cable Length:	40' (12 m)
Cable Type:	Cable Type 4-conductor, 26 AWG
Connector:	Modular connector (RJ-11)
Recommended Max Cable Length:	900' (270 m)
Housing Material:	UV-stabilized ABS plastic
Rain Collector Dimensions:	Rain Collector 8.75” diameter x 9.5” high (16.5 cm diameter x 24 cm high)

Solar Panel - 12 VDC Products

The OEM kits are supplied with a fixed tilt, 45° side-of-pole mount. The controller features a multi-function LED indicator and fuse protection. This solar panel is manufactured to exceed industry standards providing exceptional reliability and maximum power output. Its twenty-year OEM warranty assures long product life.

Works With:

Order Information

Part Number: S-PO-SOLARP

NOTE: Kit comes with battery and charger system

Applications

- Used to power OmniSite XR50s or Crystal Balls where AC power is not available.

Features

- Manufactured to exceed industry standards
- 12V 18Ah battery included with kit
- Charger and battery housed in separate NEMA 4X enclosure

Kit Includes

- A solar module
- The OmniSite SWIL6 prewired voltage regulator
- Output cable

The aluminum side-of-pole mounts includes:

- (2) clamps for nominal 2.5" through 4" poles (OD 2.875" through 4.5")
- 5 ft. cable
- Battery

Extended Runtime Backup Battery Kit

The Extended Runtime Battery Backup Kit is an option to protect an external backup battery. Works with new or existing Crystal Ball or XR50 units.

NOTE: This battery, when working with the Crystal Ball or XR50, will provide you 12+ hours of battery power for your Unit. Also works with Battery Heater Assembly (pg 58).

Works
With:

Order Information

Part Number: S-BT-CX-BBTKT

Applications

Extend life of XR50 or Crystal Ball in case of inability to attend to station immediately

Kit Includes

- Extended Runtime 7aH battery
- 36" Connector (One end will come with spade connectors for connection to the battery, and the other end will have the correct plug for connection to your Crystal Ball or XR50)
- IP65 Polycarbonate Enclosure
- Mounting Flange Kit
- 0.5" Straight Liquid Tight PVC Conduit Connector

Specifications

- Designed to IP65 of IEC 529 and NEMA 1, 2, 4, 4x, 12 and 13 specifications
- Silicone rubber gasket makes this ideal for outdoor use in a wide range of adverse conditions
- Captive, stainless steel screws thread into brass inserts for cover on/cover off applications
- UL Listed to UL508-4x specifications (File E194432)
- Durable, impact-resistant UV Stabilized Polycarbonate material

Backup Battery with Extended Runtime

OmniSite has introduced a new way to have a battery backup with this Backup Battery with Extended Runtime option. This battery, when working with the Crystal Ball or XR50, will provide you 12+ hours of battery power for your Unit. This option will work great during the winter, in the middle of the night, or anytime you can't get out to your station right away once you are notified of power loss.

Works With:

Order Information

Part Number: S-BT-CX-EBBAT

Applications

Extend life of XR50 or Crystal Ball in case of inability to attend to station immediately. Product is best if the battery will be protected in weather-proof enclosure. Purchase the Extended Runtime Backup Battery Kit on the page above if you do not already have battery protection available for external backup battery.

Features

- External Backup Battery
- 36" Connector (One end will come with spade connectors for connection to the battery, and the other end will have the correct plug for connection to your Crystal Ball or XR50). Mount inside your control panel.

Battery Heater Assembly

If installing an XR50 or Crystal Ball in a location known to drop below 15 degrees F in the winter, and the unit will be mounted directly outdoors without additional protection, then purchasing this heated battery pocket will protect the battery down to -40 degrees Fahrenheit. Includes factory prewired thermostat and circuit breaker. Must be factory installed. Works with the XR50 and Crystal Ball products with newer hinged-style, black metal work only.

Works
With:

Order Information

Part Number: S-BT-CX-HBATT

NOTE: Battery Heater Assembly does
NOT include a battery.

Applications

Extends Battery Life in Cold Climates

Features

- Includes Factory Prewired Thermostat and Circuit Breaker
- Operates in Temperatures down to -40 degrees Fahrenheit

Specifications

Length	6.75"
Width	3.25"
Height	1 1/8"
Weight	2 lbs 7 oz

OmniBeacon

OmniBeacon Replacement Battery

The OmniBeacon will automatically charge this battery using a high quality, temperature compensated battery charger. This charger works anytime primary power is present. If the battery will not charge, or becomes disconnected, a low battery alarm is issued. The backup battery allows the OmniBeacon to continue monitoring for up to 12 hours after a primary power loss.

Works With:

Order Information

Part Number: S-BT-OB-RBATT

Applications

Replace current battery in OmniBeacon.

Features

This replacement battery is rechargeable.

Specifications

Battery Type	Sealed Lead Acid	Length	3.82"
Voltage	6 VDC	Width	0.94"
Amp Hours	1.2 Amp Hours	Height	2.03"
Connectors	0.187" Faston Spades	Weight	0.64 lbs

CELLULAR WIRELESS SERVICE

All of OmniSite's products are cellular based – much like a personal cell phone. Therefore our products require an active cellular plan to deliver alarms and notifications. Prices for cellular service are available through your local OmniSite sales representative. Service is directly billed to the end user/customer annually. The cost of service includes access to GuardDog, our cloud-based data collection and alarm software. GuardDog is available on both web-based and mobile app platforms.

REPAIR POLICIES

■ Our 'No Hassle' Repair Policy	_____	66
■ Order Options and Information	_____	66
■ OmniAdvantage Plan	_____	67

Our 'No Hassle' Repair Policy

The primary cost component in all our products is the “motherboard.” This is the electronic printed circuit board that orchestrates most of the product’s functions. If we find your product’s motherboard has failed, then we will replace your entire product for a standard replacement price. This is our ‘**No Hassle**’ Repair Policy. Regardless of the product’s age, we will replace your product.

Other Repairs Policy

If the repair is for any items other than the motherboard, we will invoice you our flat-rate repair fee.

To return a product to OmniSite for repairs:

Call or email our technical support line and receive an RMA number (Returned Material Authorization).

Prior to shipping product to OmniSite on RMA, the person(s) who will be responsible for repair fees (either the customer or their area sales representative) must issue a purchase order number to OmniSite. Upon receipt of the returned product on RMA, OmniSite will determine the cause of the fault and provide a quote for the necessary repair or recommended replacement. All repair or replacement assessments are at OmniSite’s discretion.

Order Options and Information

REPAIR TIER #1

If the primary motherboard on an XR50, Viper, or Crystal Ball is damaged for any product, get an entirely new product (of same type, or upgrade at OmniSite’s discretion) if more than two years old (price includes return shipping to customer).

REPAIR TIER #2

All other repairs for XR50 and Crystal Ball related to power supply, radio, radio carrier board, LCD display, and other misc, OR your product is NOT more than 2 years old (price includes return shipping to customer).

REPAIR TIER #3

All repairs for OmniBeacon Product, which is our lower cost product, are billed at a flat fee regardless of parts used.

R-RD-CX/CV (VZW OR ATT)

Radio upgrade Kit for XR50, Crystal Ball or Viper - must specify product model and unit number for radio kit upgrade.

R-RD-OB (VZW OR ATT)

Radio upgrade Kit for OmniBeacon- must specify product version (SmarteLight or OmniBeacon) and unit number for radio kit upgrade.

OmniAdvantage Plan

Put an end to repair and replacement costs with the OmniAdvantage plan. This annual subscription plan covers repairs and replacements on your device for the length of the subscription.

As an OmniAdvantage Plan member you get:

- Lifetime Product Updates
- Lifetime Radio Upgrades
- Free Software Upgrades and Full-Featured GuardDog 2 Mobile App
- GuardDog Web Browser Setup and Priority Support
- Professional Training
