

PRODUCT END OF LIFE (EOL) NOTIFICATION

What is Product End of Life (EOL)? Why is it being implemented?

OmniSite is committed to providing the highest quality products and services to our customers. As a technology developer and provider, we understand that technology evolution enables our customers to achieve operational efficiencies, act upon issues before they become large problems, and protect the environment from overflows. That is why we are dedicated to researching and developing new technologies to grow our product lines and offerings. All technology products eventually reach the end of their useful life requiring a business decision to discontinue availability, maintenance and service. At OmniSite, we view product EOL as a part of the life cycle that drives new technology and product innovation so we can best serve you, our valued customer.

What products are affected?

The four models listed below have reached a point in their life cycle where components are increasingly difficult to source, or the units aren't compatible with new cellular radio options. This letter details critical dates for the EOL of these affected models. The "End-of-Sale" date was the last date the model was available to purchase. The "End-of-Service" date lists the last possible date that all units of that model type will cease to work.

What are my options going forward?

OmniSite understands how integral this equipment is to your overall productivity. We value your business and have created an offer for you to trade in these devices for the newest technology we offer. For trade in options contact us at 317-885-6330 option 4.
