

Outdoor Omnidirectional Phantom Antenna with Mounting Bracket Kit

The Outdoor Phantom Antenna Bracket Kit w/ Coax Cable is a great option for improving the cellular reception of your OmniSite unit when a High Gain Directional Antenna may not be required.

This is the antenna you will want to order if you are mounting your XR50 or Crystal Ball inside of a **METAL** pump control panel. If your XR50 or Crystal Ball is mounted in a plastic or fiberglass enclosure, we recommend using our Stubby 4G Antenna (page 39).

Works With:

Crystal Ball

XR50

Order Information

Part Number: S-CBL-CX-ABRK

A coax cable is **NOT** included. Select your desired coax cable length at purchase. See page 38 of the Product Catalog.

Applications

Increase cellular reception for your XR50 or Crystal Ball. Used if your product is mounted underground, in a metal cabinet, or in a low lying area.

Kit Includes

- (1) Phantom Antenna
- (1) Custom Mounting Bracket
- (2) 3" Strip of Weather Sealant & Marking Tape
